This invention pertains to a non-volatile semiconductor memory device and more particularly to a non-volatile EPROM and E.sup.2 PROM of the type that uses charge tunneling for erasing and writing in the event that a computer program running on the device is altered. Computer security is of increasingly greater concern. From the standpoint of the end user, it is preferable that programs be rewritten only by authorized persons. For this reason, it is common to allow the end user to write only programs that they have developed or purchased. Thus, the security of computer programs from this standpoint depends on the fact that only authorized persons can rewrite the program. To protect the security of programs stored in non-volatile memory devices, it is common to use an altered program detector and recorder. With such a device, the owner of a computer cannot alter the programs stored on the memory devices without some further action being taken by the owner to change the device. It is preferable to do this from the standpoint of the owner of the device. Thus, even if a program is stored on the device in altered form, it is desirable that the owner of the

So, you want to try out the 3D Print technology for yourself. This is what you could do so far. You got this printer and the bottles are all in a circle. We set the bottles aside and we're going to try to shoot the alignment of the face to the first bottle in the row or the row. So let's see. So first, we need to make sure that the needle alignment correctly. If I push on the orange part, it's going to change the position of the needle or the alignment of the needle. So, let's see. So, this is fixed. If we just put it and if we move the head or move the red needle, I mean, if we push on the orange, it will not affect the other bottles. So, we can use this to align all of the sides. So then, we have our alignment, we can move on to the next step and the next part. We can go on. So, first we have to place the collet into the corresponding hole. Now, we've aligned it correctly. The next step is we want to tighten it, so we can tighter the collet. We tighten the screws down. And, if you move these three screws at the same time, the third one will not have any effect on the other two. So, we have our collet. And, we've taken care of the three screws. Now let's do the pull test. So now, we can start pulling back to see if it will pull back. If we pull, and we look at this, if we do want to pull it 1c3b36666d
