"As if George Carlin lived in Russia and one day decided to make a mod for Postal 2 which would be based on the story of Only If. Well, that's a terrible pitch, but I'm tired. Now would you be so kind to get your fuckin' microphone out of my face, stop asking me about your fuckin' game and just let me go?" - Random Man On The Street

The Last Dogma is a surreal black comedy exploration adventure game set in the year 1999 of an alternate reality world, where US actively campaigns for world domination after being disappointed with the results of the Cold War. Inspired by the history of humankind, free of clichés and moral borders, made in Hell.

You play as Sebastian Arise, an ATF special agent tasked with the tracking and eradication of local firearms dealers. One day straightforward tracking mission turns into disaster, thrusting him into the village of cannibalistic Christian cult known as "Holy Intentions". Entwined in a web of intrigues between emotion-feeding daemons, Sebastian must keep his senses sharp as he travels back in 1366 A.D. to stop the things he shouldn't stop.

!

The game is a reimagining of Sacred Line Genesis, horror text adventure game for Sega Genesis / Mega Drive. And it's definitely not a shooter.

Recommended for fans of Killer7, Deadly Premonition, Only If, Postal, Normality and Pathologic (**NOT INSPIRED** by them), for open-minded people who prefer story and exploration over action / mechanical gaming and for people who are still looking for secrets in the games they play. Also for people who love movies of Richard Kelly, David Lynch and Quentin Dupieux.

This game is too buggy to play in linux.. what the \u2665\u2665\u2665\u2665 just happened. Deliberately stupid. It didn't cure my hangover but it helped me cope.. It has a funny, interesting, satirical story and the graphics are pretty great on my machine! Could use a little more interaction though. Quite disappointed I couldn't shoot the first cannibals I found in the game :(.. Also, couldn't climb up some of the structures and get info on others.

After playing this more, it is pretty buggy (the chapter select doesn't work and I see a gun but can't pick it up?). I'm not really sure what to do in this world and the game isn't giving me any hints. It's pretty frustrating. Glad I only paid \$2 for this. The beginning story is really the only thing going for this game so far for me.. This was a waste of time, It was cryptic for the sake of it.

Honestly was so excited by some of the humour until 10 min later the game was over.

. This game is too buggy to play in linux.. what the ♥♥♥♥ just happened. This game.

Oh lordy, this game is so brilliant.

First the author is generous enough to start out by saying that if our tiny minds cannot fathom the depth of the story, fear not, it's already explained in a pinned forum post.

Well thankfully I saw that so I didn't have to waste my precious riddlin on intro cinema - which came, i'm told in HD. Sadly my computer just couldn't keep up and kept skipping frames.

After being told how stupid, useless and incompetent the Russians are -which is great satire I must admit. HA! - the narrator states that the U.S. Elected Sam Shotgun, aka Uncle Sam. It's funny because we have a reference to the idea of Uncle Sam, how witty. The United Kingdoms apparently kicked the Queen out and elected a Irannian, as you do, then was invaded by "the arab states" As you know, you cannot trust them. Then we tricked "The Africans" obeying the U.S. with the bible- because the U.S. only has one god- and since we airdropped them instead of "contraceptives" they thought to themselves"the books came from the sky, it was the word of God."

Such Satire is amazing. How could this writer even be making games? The next Stephen King is right here!

But I digress, my tiny mind was so thankful the narrator stuck around to give me a simple, not at all condesending tutorial. I felt like I was playing my old favorite games again.

I sadly didn't make it very far, my tiny brain couldn't focus on all that HEAVY dialog and jokes about unkillable characters being in a "NPC" state.

10V10 would defiantely review again and again until they stop removing it.. Lack of mouse invert option. Developer denied implement it ever at all.

Well that was dissapointing. The mouse sensitivity is ridiculous and there are no options to change it. My pc massively exceeds the recommended specs yet the game is laggy and constantly skipping frames. I like wierd games but this one is just ugly. At least its only a fiver. This is not a game for everyone. This is a game for who loves b-movies, absurd conspiracies, random LULZ, unconventional videogames that don't take themselves too seriously, Francis York Morgan and the narrator from Stanley Parable. The Last Dogma is a low-budget surreal story that plays with meta-references, social jokes, unpredictable stories and nonsense characters. It's short and it's not a masterpiece, but its awkward style and unpolished world tell you something more than what multi billion AAA games will ever be able to explain: games are games, people are people, and some people will enjoy games made by people with the same mindset. Just take this for what it is, support off-beat developers, enjoy the ride and Sebastian will be your new BFF.. Lack of mouse invert option. Developer denied implement it ever at all.. The Last Dogma runs in Linux as well as Windows. I was able to install it and run with Mint 17 64-bit on my GeForce 550 Ti using Nvidia 331 drivers.

It ran perfectly with default video settings. If you try to increase the texture quality your system might have a low frame rate as a result.

Otherwise it ran fine and I was able to explore the world and interact.

Interesting surreal game. Wait, did I spend money on this?

It's a parody game, poking fun at a lot of things, but especially at bad games in general. It is quite funny at times. I was laughing out loud at the finale sequence. But it's absolutely not worth any money.. Buggy, poorly put together and written in angsty pre-teen style.

It feels like someone's first game. If so, it's very good for a first game, but it has no business being sold.
